

To Whom It May Concern:

I respectfully urge the FCC to reject petition 04-160 by the National Association of Broadcasters. I've been using XM Satellite Radio for about 9 months now and it's reintroduced me to the joy of listening to the radio after giving up on local broadcast stations.

This petition by the NAB smacks of their consistent objection to any innovation in broadcasting -- instead of updating their technology and business models to compete with upstart ventures with better ideas, products and programming, they want to stifle their competitors with regulations. Let the market decide what service is more valuable, and let consumers decide what they want to listen to.

Sincerely

Charles Longino
